

## Digital Health declaration

---

For all passengers aged 13 years or older travelling to and from the Netherlands a health declaration form is mandatory before boarding and the passenger must be able to show the completed form when asked by the appropriate authorities.

At this moment the hard-copy (paper) version is sent to passengers before the flight by the Airline or passengers can fill out the form at the Airport. To streamline and simplify the process for Airports, Airlines and our passengers we ask you to embed the questions in the online check-in process. Some Airlines already started to implement this and expect to go live into 2 weeks.

The regulations for embedding these questions in the online check-in process are as follows:

- The enclosed declaration will be embedded in the online check-in process;
- Completing the health declaration embedded in the online check-in process can only be done in the last 36 hours prior to departure of the flight;
- Passengers that check-in via common use self-service check-in (CUSSCI) machines or common use self-service drop-off machines (CUSSDOP), must complete the identical question as enclosed with this update;
- Failure to comply with the declarations, must deny the passenger the possibility to complete check-in, regardless if this is done online, via CUSSCI or CUSSDOP. If the passenger does not comply with the declarations, the passengers must be unable to obtain or print a boarding pass;
- The airline ensures that all passengers complete the process so obtaining a boarding pass can be used as proof of completing the triage process;
- The declarations must be embedded as a separate and necessary step in the check-in process;
- The declarations will be shown consecutively on the same screen, whereby the first step will be to agree to the first declaration, in order to show the following declaration etc. The passengers has the possibility to review the declarations but not to read ahead;
- In addition to this process, the airline will ensure a visual observation of passengers will be carried out at the gate, prior to boarding.
- Airlines that choose to embed the Health Declaration digitally in the check-in process, will inform the Accountmanager Airlines & Handlers upon completion. The Accountmanager Airlines & Handlers will notify the Ministry of Infrastructure and Water Management, Ministry of Health, Welfare and Sport and the Municipal Health Services who will verify the embedding is completed in compliance with these regulations.

### Health declaration (English version)

I understand that because of the coronavirus (COVID-19) safety requirements are in place for travelling. The risk of spreading the coronavirus (COVID-19) must be limited as much as possible. That is why I issue the health declaration below.

If I travel in a group, this declaration applies to all passengers that I check in. I understand that I am not allowed to board my flight if I cannot declare the following:

- I **declare** that I will not come to the airport and that I will not fly if:
  - I have been in contact in the past ten days with someone who is (presumably) infected with the coronavirus (COVID-19);
  - I (possibly) have pneumonia or coronavirus infection (COVID-19).
  
- I **declare** that I know that I am not allowed to fly if I experience symptoms that are consistent with the coronavirus (COVID-19). Therefore, I declare that I will not fly when one or more of the following cases apply to me:
  - I have had a high temperature or a fever in the past 24 hours;
  - I have had a cold (nasal cold, runny nose, sneezing, sore throat or coughing) in the past 24 hours;
  - I have been short of breath in the past 24 hours;
  - I suddenly lost my smell and/or taste in the past 24 hours.
  
- I **declare** that I am 13 years or older and that I have completed this health declaration truthfully. I **declare** that I will fully cooperate to minimize the risk of spreading the coronavirus (COVID-19).

I understand that I am not allowed to board the aircraft if my health declaration turns out to be incorrect. For example, if I do have one of the above-mentioned symptoms when I am at the airport.

**Important:** Keep your boarding pass (digital or printed) with you throughout your journey. The local authorities may ask you to show it as proof that you have completed this health declaration.

### Gezondheidsverklaring (Dutch version)

Ik begrijp dat er vanwege het coronavirus (COVID-19) veiligheidseisen worden gesteld aan het reizen. Het risico van verspreiding van het coronavirus (COVID-19) moet zo veel mogelijk worden beperkt. Daarom geef ik onderstaande gezondheidsverklaring af.

Als ik reis in een groep, dan geldt deze verklaring voor alle passagiers die ik incheck. Ik begrijp dat ik niet aan boord mag gaan van mijn vlucht als ik het volgende niet kan verklaren:

- Ik **verklaar** dat ik niet naar de luchthaven zal komen en niet zal vliegen, als:
  - ik in de afgelopen tien dagen contact heb gehad met iemand die (vermoedelijk) besmet is met het coronavirus (COVID-19);
  - ik (mogelijk) een longontsteking of coronavirusinfectie (COVID-19) heb.
  
- Ik **verklaar** dat ik weet dat ik niet mag vliegen met klachten die passen bij het coronavirus (COVID-19). Ik **verklaar** daarom dat ik niet zal vliegen in één of meer van de volgende gevallen:
  - ik heb in de afgelopen 24 uur verhoging of koorts gehad;
  - ik heb in de afgelopen 24 uur last gehad van verkoudheid (neusverkoudheid, loopneus, niezen, keelpijn of hoesten);
  - ik in de afgelopen 24 uur kortademig ben geweest;
  - ik verloor plotseling mijn reuk en/of smaak in de afgelopen 24 uur.
  
- Ik **verklaar** dat ik 13 jaar of ouder ben en deze gezondheidsverklaring naar waarheid heb ingevuld. Ik **verklaar** dat ik volledig meewerk om het risico van verspreiding van het coronavirus (COVID-19) zo veel mogelijk te beperken.

Ik begrijp dat ik het vliegtuig niet in mag als mijn gezondheidsverklaring niet juist blijkt te zijn. Bijvoorbeeld als ik toch één van de bovenstaande symptomen blijf te hebben als ik op de luchthaven ben.

**Belangrijk:** Houd uw instapkaart/boarding pass (digitaal of geprint) bij u gedurende uw gehele reis. De lokale autoriteiten kunnen u vragen deze te laten zien als bewijs dat u deze gezondheidsverklaring hebt ingevuld.
