Your step by step guide to checking in on the Ryanair APP

Important notice:

We accept mobile boarding passes on flights from the majority of airports on our network.

However unfortunately some airports cannot accept mobile boarding passes yet, these airports are:
Agadir, Essaouira, Fez, Nador, Oujda, Marrakesh, Rabat, Tangier, Kefalonia and Volos

Customers traveling from these airports must check in online and print out a paper boarding pass for their flight(s).

Checking in with the Ryanair app is simple and can be done anywhere. Just follow the steps outlined below.
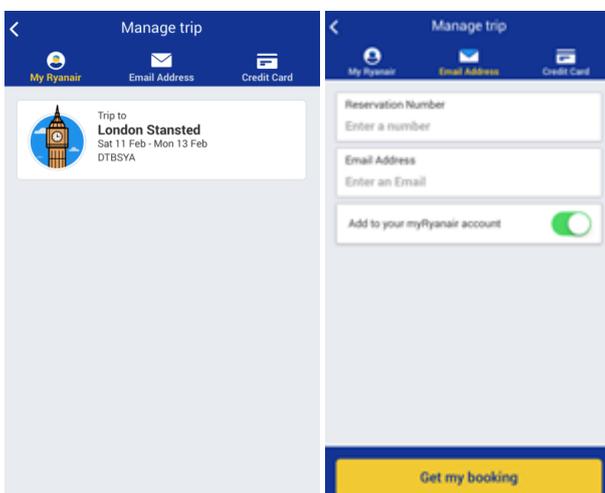

Early check-in is open 30 days from the time of departure and is available with the purchase of a seat. **Standard (free) check-in** is open 4 days from the time of departure.

Open the Ryanair app
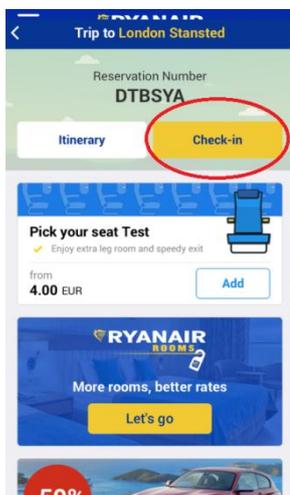

Select the Check-in option

Retrieve your booking – you can do this either by selecting My Ryanair option if you are logged in or by selecting the option Email Address and filling in your six digit Reservation Number and Email Address used when making the booking.
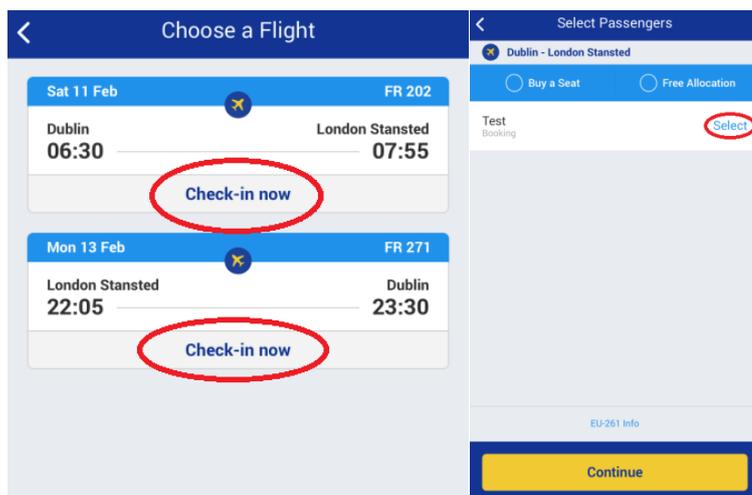

Error messages can happen. Don't worry; it is usually something very simple, like a mistyped letter or number in your reservation number or a typo or incorrect email address.
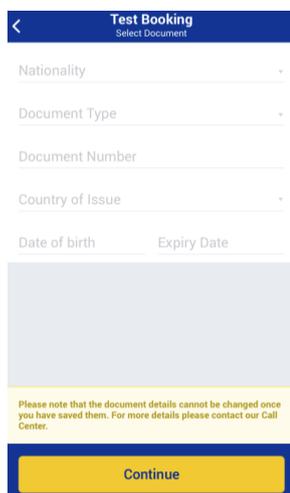

Once you have retrieved your booking you will then have the opportunity to select and purchase your seats if you haven't already done so. If you wish to bypass this option you should proceed to Check-in.

You can now select the flights on which you wish to check-in. On the following screen you then must select to either purchase your seat or be randomly allocated a seat for free (if your flight is within 4 days) and also the passengers you wish to check-in. When done click on Continue on the bottom of screen.

- Fill in your ID / passport details and select Continue.

Once the above steps have been completed, your boarding pass will be displayed. You can now save this on your mobile device or retrieve from the Ryanair app main menu. You do not need to print the boarding pass, the mobile boarding pass is sufficient to board your flight.
