RYANAIR AND THE ENVIRONMENT

We support the 2015 Paris Agreement, Destination 2050, the United Nations Global Compact and the 17 UN Sustainable Development Goals. Here are some examples of how we demonstrated our commitment to sustainable aviation over the past 12 months.

RYANAIR SUSTAINABLE RESEARCH CENTRE

We announced the extension of our partnership with Trinity College Dublin out to the end of the decade. We will make a further €2.5m donation (€4m total) to fund the Ryanair Sustainable Aviation Research Centre.

The Research Centre examines Sustainable Aviation Fuel (SAF), zero carbon aircraft propulsion systems and non-CO₂ Emissions.

Ryanair extends Trinity College Dublin partnership to 2030

SCIMITAR WINGLET INSTALLATION

We retrofitted 25% of our Boeing 737-800NG fleet with split scimitar winglet technology (target 409 by 2026). These winglets reduce carbon emissions and fuel burn by approximately 1.5%, while lowering take off noise by over 6% and decreasing NOx emissions by 8%.

25%
of our Boeing 737-800NG fleet retrofitted with split scimitar winglet technology

AIR TRAFFIC MANAGEMENT REFORM

We presented our petition "Protect Overflights: Keep EU Skies Open" to the European Commission. The petition had over 2m signatures from frustrated passengers demanding action to protect overflights during repeated ATC strikes. By enabling overflights during strike action, additional emissions could be eliminated where currently aircraft are forced to fly longer to avoid the closed airspace.

SIGN THE PETITION

SUSTAINABLE AVIATION FUEL (SAF)

SAF can reduce greenhouse gas emissions by up to 80%. We have an industry leading target of 12.5% of our 2030 fuel requirements coming from SAF. To achieve this target, we purchased 1,000 tonnes of SAF from Shell to supply its fleet at Stansted Airport in the UK.

This follows on from other agreements in Austria, France, Netherlands, Norway and Sweden.
